

Stick the Pads on Annie

St John
Ambulance
Cymru

Use the cut out pads and try to stick them in the correct position on Annie, whilst blindfolded.
The closest person wins!

We've outlined the correct position for the defib pads. The first pad should be placed on Annie's upper right side, below the collar bone. The second pad should be placed on Annie's left side, just below the armpit with the long edge running head to toe.
